

Muhammed Rabeeh PK

Full-stack & App Developer

I'm a full-stack developer with over one year of experience in full-stack, mobile, and desktop application development. I've worked on both team and solo projects and have a strong ability to quickly learn new programming languages and tools. I developed these skills through a self-learning training program that simulated a corporate environment. I'm now seeking a challenging role in full-stack or front-end development where I can apply and further expand my technical expertise.

Experience

Infineur Digital Creations Pvt Ltd.

Position : Full Stack Developer **Type** : Full-time (WFH)
Location : Kasargod **Duration** : 1 Year

Worked as a Full Stack Developer handling both web and mobile application development, including Android and iOS app builds using React Native. Managed server setup, deployment, and maintenance, along with Play Store and App Store releases. Contributed to project planning, system design, and ensured smooth delivery of high-quality products.

Dewdropology Tech Soft Pvt Ltd

Position : Full Stack web developer **Type** : Full-time (onsite)
Location : Bangalore **Duration** : 2 months

Worked as a Full Stack Web Developer, contributing to both front-end and back-end development using React, Next.js, Tailwind CSS, Django REST Framework, and PostgreSQL. Collaborated on PHP projects and assisted in project planning, deployment, and hosting tasks, gaining practical experience in full-cycle web development and team collaboration.

Projects

BuyhomesUK

 [iOS](#)  [Android](#)  [Live](#)

A real-estate property listing platform based in the UAE. I worked on their web, Android, and iOS app development and deployment. I partially contributed to the backend, managing multiple user roles.

Skills: **NexrJS, React Native, Expo, MySQL, Laravel, Google Maps, Email OTP, SMTP, OneSignal, i18n.**

- This app and website allow users to list and view properties and contact agents.
- Advanced property filtering options for both web and app.
- Admin-controlled property listings for agents.
- SMTP mail notifications automatically sent when users contact agents.
- App notifications using OneSignal.
- i18n used for more than 9 languages on web and app.

InstacarBuyers

 [iOS](#)  [Android](#)  [Live](#)

InstaCarBuyers is a UAE-based car bidding platform designed to simplify car selling through a transparent and competitive live bidding system. The platform allows users to list their vehicles and receive real-time bids from potential buyers.

Skills: **NexrJS, React Native, Expo, SocketIO, Phone OTP, SMTP, OneSignal.**

- This project uses Socket.IO for real-time bidding.
- Implemented Max Bid option to lead the bidding to the given price.
- Favorite feature for getting notifications when a bid starts.

Personal Details

Country : India
State : Kerala
Year of Birth : 2003

Skills

Programing Languages

- Python
- Java script
- Type script
- HTML & CSS
- PHP (middle)
- c , java (basic)

Database

- PostgrSQL
- MongoDB
- MySQL
- SQLite

Framework & Library

- React JS
- Next JS
- Django
- Electron JS
- React Native
- Capacitor JS
- Rest API
- Bootstrap
- Tailwind,
- expo.

Hosting

- AWS (EC2)
- Hostinger,
- Vercel,
- Github pages
- Nginx (basic)
- Godady
- Digitalocean
- Cyber Panel

Other

- DSA
- Gunicorn
- Communication
- Axios
- yarn
- Typing (3 Lug)

Tools and Software

- Wordpress
- Shopify
- Figma
- Canva
- Adobe Photoshop
- Adobe Publisher
- MS Office
- Adobe XD

Pykin

Pykin is a food delivery app located in Kasargod. I worked on their new mobile app for Android and iOS. React Native is used with Expo for development. The app already has 5000+ downloads on the Play Store and App Store.

Skills: **React Native, Expo, OneSignal, EasyBuz Payment.**

- Modern UI and UX.
- OneSignal used for in-app notifications.
- Integrated EasyBuz payment gateway SDK and web for payment.

Mahalli software (Desktop app)

A Mahalli management software built with Django (SQLite) and React Vite, packaged for Windows using Electron and PyInstaller. It securely manages areas, houses, members, collections, and dues, syncing Firebase data with the local database. With export/import and Google Drive backup options, it's a simple, efficient, and low-cost solution.

Skills: **Electron JS, React vite, Django, SQLite, Pyinstaller, Firebase.**

- Electron JS and PyInstaller used to create application.
- Data backup and restore function implemented.
- Firebase used for storing and retrieving publicly needed data.

Nearshop.online

A multi-vendor eCommerce application designed to connect shops and customers with integrated billing management for shops.

Skills: **React, Django, PostgreSQL, RestApi, JWT, Google Maps, Google auth, Firebase, AWS, Unicorn, Github, git, Bootstrap, Phone OTP auth, Razorpay.**

- Implemented four authentication methods (OTP, Google, email, and username/password) for three types of users.
- Integrated Google Maps to connect customers with nearby shops.
- The global product concept helps reduce duplicate product entries.
- Owners can manage multiple shops, while shops can handle billing, orders, and payments. Customers can place orders and view all their purchase bills.

Hotler

this website helps cafes, messes, hotels, and restaurants. we planned to implement a QR ordering system without customer authentication

Skills: **Next JS, Next UI, Framer-motion, Tailwind, Firebase storage, Google map, Chart JS, Next auth, next-themes.**

- This is a team project, I focused on the frontend.
- Subscription setup for shops.
- QR scan for order.
- Simple shop management system including product and order management.

Modapps.in

Appstore and blog website.

Skills: **React vita, Django, PostgreSQL, Redux, RestApi, JWT, Google Analytics, AWS, Unicorn, Github, git, Tailwind, NextUI, Framer-motion, Jodit editor, Theams, Axios.**

- Admin can manage and apps post and blogs.
- I implemented Google Analytics to understand traffic views.
- NextUI and Framer motion are implemented for a better user experience.
- Jodit text editor tool implemented to write blogs.
- Hosted this website on AWS.

Languages

- Malayalam (Native)
- English (speak and write)
- Arabic (Read and write)

Educational Background

Course : Full-stack

Brototype (Bootcamp)

2023 - 2024

- A Self-learning Program.
- I specialized in Python Django and React JS.

Degree : BA Arabic

University of Calicut

2020 - 2023

- Arabic language and History.
- Personal developments.
- Groupwork and leadership

Course : Islamic Studies

Jamia Mahiriyya college

2014 - 2023

- Arabic language.
- Islamic studies.
- Team management.
- Tech & Media team leader.
- Leadership and Teaching Skills.
- Personal developments.
